- 📍 Lahore, Pakistan

👤 Summary

Skilled in crafting dynamic, user-centric web solutions using modern frontend technologies (Bootstrap, Tailwind, React) and backend development (Node.js, Express.js, MongoDB). Enthusiastic about creating seamless, high-performance applications through clean code and efficient system design. Adept at bridging frontend interfaces with robust server-side logic for end-to-end functionality

📖 Languages

- English – Intermediate
- Urdu – Native

🎓 Education

Bachelor of BS Computer Science
Minhaj University Lahore   2021-2025

Gained strong foundations in software engineering, data structures, algorithms, and database management systems.
Achieved consistent academic performance and successfully defended a final-year project
FYP *Cross University Event Management system (CUEMS)*
Technologies:
- *Frontend: React.js modern UI and context api for state management.*
- *Backend: Node.js and Express.js for building secure RESTful APIs.*
- *Database: MongoDB with Mongoose for flexible data storage.*

FSc Pre-Engineering
Punjab College Mian Channu   2018-2020

💼 Professional Experience

Frontend Developer   07/24-01/25
Teal Spark

Lesson Planner

Developed a Lesson Planner in Vanilla JavaScript featuring drag and drop functionality and local storage integration, enabling teachers to efficiently manage and organize lesson plans.

Battle Arena Web Game

Developed a JavaScript-based Battle Arena web game where heroes and villains engage in turn-based combat. Implemented combat mechanics (health, abilities, win conditions), reusable UI components, and deployed a performant build to Vercel for public access.

Gym Management System

Developed a Gym Management System for managing member registrations, attendance, and subscriptions

💼 Core Skills

Frontend Development
 React.js, Material-UI, Tailwind CSS, Bootstrap

Backend Development
Node.js, Express.js

Database Design & Integration
 MongoDB, MySQL

State Management
 Redux

API Development
 RESTful APIs, Authentication, Data Security, Algolia AI improve user experience

Tools
 Git, GitHub, Testing (Postman)
